# 100% AMERICAN STRONG

**MADE STRONG IN AMERICA — FROM CHAIN TO HOOK.**

**A STRONG LEGACY,  
A STRONG FUTURE.**

Over the decades, thousands of tough applications and just as many demanding customers have forged the Campbell brand. Today, Campbell industrial rigging solutions stand for strength. Campbell industrial fittings are closed-die drop-forged for superior strength and performance, and all alloy lifting chains and associated alloy chain fittings are 100% load-tested to at least 2X the working load limit as “proof” of their reliability. Campbell chain and fittings are designed to maximize performance and expertly manufactured at our Pennsylvania and New York plants by skilled American craftsmen. Trust Campbell performance: 100% American strong.

**SINGLE-SOURCE RIGGING SOLUTIONS.**

Campbell’s in-house team of chain, fitting and rigging specialists will find the right solution for your job. With more than 40 qualified technical and training professionals throughout North America, you’re never far from expert advice or the right answer. Campbell’s technical support, expertise and training provide total customer satisfaction with our full line of material-handling products. What’s more, both Campbell plants are ISO 9001-certified, assuring quality control at every step of manufacturing.

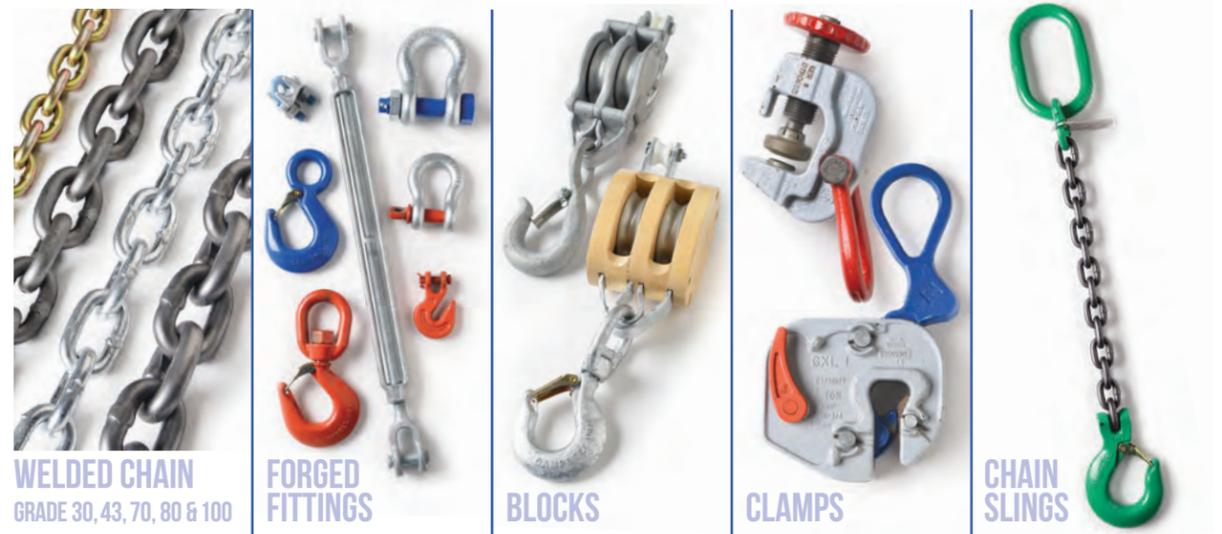

**WHEN YOU NEED IT NOW, CALL CAMPBELL FIRST.**

You have deadlines to meet, onsite inspections to pass, customers to satisfy. You have zero tolerance for downtime or delivery promises that aren’t kept. So when you need 3,000 feet of Grade 100 chain or a replacement clamp ASAP or the job won’t meet deadline, we’ll deliver it fast to your jobsite from one of four Campbell distribution centers in the U.S. and Canada, even hot-shotting it your way, if necessary.

Whether you’re positioning 6-metric ton steel plates on a new bridge or trucking heavy equipment and structures cross-country, there’s no rigging job too challenging for Campbell. Specify Campbell chain and rigging solutions – 100% American strong.

**IF YOU LIFT, TOW OR BIND IT,  
AND DEMAND UNEQUALLED SAFETY AND SECURITY, SPECIFY CAMPBELL STRENGTH:**

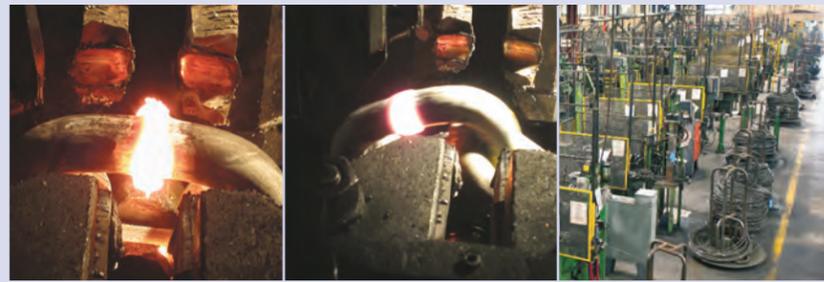

**WELDED CHAIN**  
GRADE 30, 43, 70, 80 & 100

**FORGED FITTINGS**

**BLOCKS**

**CLAMPS**

**CHAIN SLINGS**

Campbell, one of the largest manufacturers of welded and weldless chain in the U.S., produces more than 32 million pounds—or over 9,000 miles—of chain each year. In addition to alloy lifting chain, Campbell offers a full line of chain and fittings for non-rigging applications.

**GRADE 100 FITTINGS**

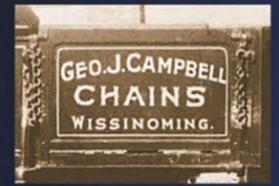

Campbell pioneered the use of Grade 100 products over 20 years ago. Today, our Grade 100 products, including everything from master links to foundry hooks, deliver 25% higher working loads, proof-test loads and breaking strengths than the Grade 80 competition. That means lighter, more ergonomic and less expensive chain slings, benefiting your employees and your bottom line.

**CARBON SHACKLE**

**ALLOY SHACKLE**

Campbell offers a full line of rigging hardware, including shackles, hooks, turnbuckles, wire rope clips, swivels and blocks. Our newly expanded line of alloy shackles are drop-forged and heat-treated for superior strength and performance. Screw-pin anchor shackles are available in sizes ranging from 3/8” through 2”, while our bolt-type anchor shackle line encompasses sizes from 3/8” through 2-1/2”. The expanded line includes 22 different shackles and delivers a working load limit range of 2 to 85 metric tons.

The Campbell story is a long chain of legacy companies and proud industry names—from the Brewer Harness Company, formed in 1834 in Cortland, NY, to the Victory Chain Company of 1919 and its subsequent purchase by George Campbell and its renaming to the International Chain Company. And that’s just the beginning. In 1949, International became the Campbell Chain company and, following a series of acquisitions over the next decades, including of Merrill, Brewer-Titchener and Covert, Campbell Chain has evolved into the premier manufacturer of chain, fittings, blocks, clamps and other rigging hardware.

Along with its history has come benchmark innovation. Campbell pioneered the use of Grade 100 chain and fittings over 20 years ago and was the first to yellow-chromate transport chain — both of which have become industry standards. Today, Campbell, a division of Apex Tool Group, is a leader in total rigging solutions, with a forged product offering that’s one of the largest in the industry.
